

## Telling stories - with technical devices

**Inhalt:** "Storytelling is among the oldest forms of communication. Storytelling is the commonality of all human beings, in all places, in all times." This quote by the theatre and education professor Rives Collins shades the value of telling stories. Our whole lives are made of stories and the better a story is told the more one can enjoy it and learn from it. Not only but especially young learners benefit from being told stories. There are so many ways in which stories can be told and even more topics a story can relate to. When storytelling finds its way into the EFL classroom students will not only benefit from the method of teaching in order to improve their language competence. Also the learning atmosphere, the enjoyment of studying a foreign language and the excitement for new contents will be enriched. This teachers training will offer various ideas to make story telling enjoyable for both: the students AND the teachers. Throughout the course various ways of telling stories will be introduced, experienced and discussed. By using technical devices to tell stories a new component will be added to the common method.
