II Reading Comprehension

Read the following text.

Lego Friends

by Charles Bennett

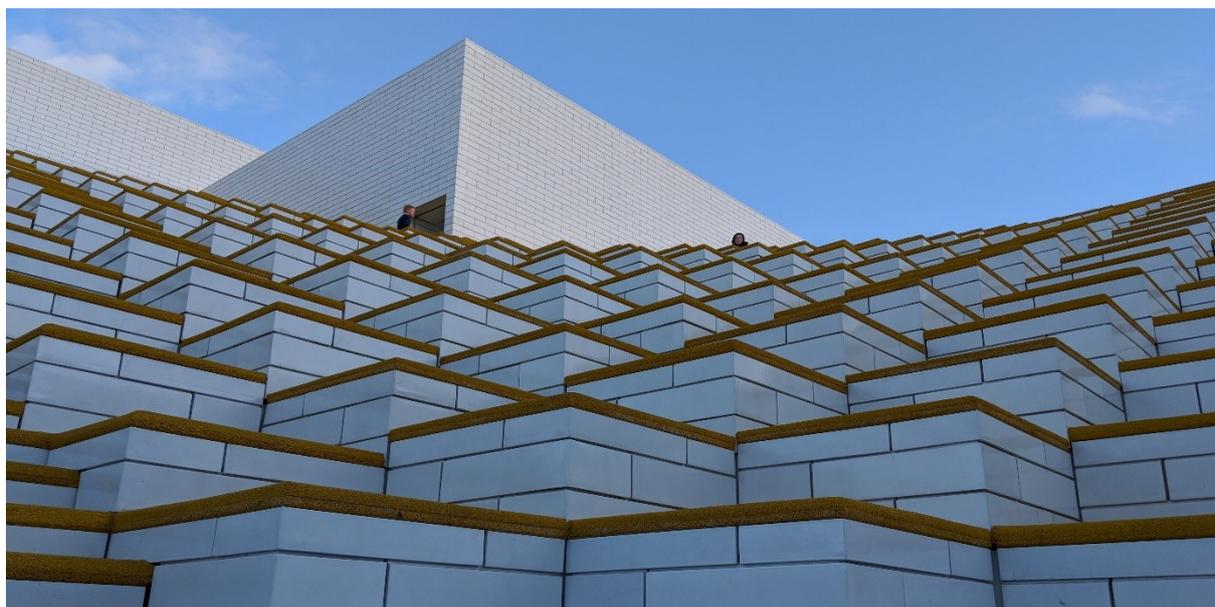

Last summer, I went to Denmark with my family and my best friend Felix. We had a great time at the beach, but the best day was when we visited the Lego House.

When we arrived we were really excited because we just love Lego. The Lego House looks like somebody put together many big Lego bricks. That's so cool! You can even climb on them! But we wanted to see what is inside, of course. First we went into the main hall where we saw a Lego tree. It was 15 metres tall, and guess how many bricks they needed to build that tree – over 6 million!

Then we went up the stairs to the next floor where you could see fantastic Lego dinosaur models. But what Felix and I liked best was that there were lots of Lego bricks everywhere, which you could use to build your own models. At one station, I built a pyramid and Felix made funny Lego flowers.

When we got hungry, we decided to have lunch in the Lego House restaurant. It is not like a normal restaurant because you use a computer to order your food. When it is ready, a robot gives it to you in a box that looks like a Lego brick. Isn't that great? And it was yummy, too!

After lunch, we went to a room where they presented the history of Lego and showed old models. Felix and I had an amazing time at the Lego House.

Answer the following questions. You need not write complete sentences.

1. When did Charles' family go on holiday?

2. Where is the Lego House?

3. How did Charles and Felix feel when they came to the Lego house?

4. What is in the main hall of the Lego House?

5. What can you find upstairs?

6. What did Felix do at one station?

7. Why is the Lego restaurant special? (*Write two facts.*)

8. What did the boys see in the afternoon?
